Model 79C Door Panel For Frames 01, 02, 03, 04 & 05 Installation Instructions

Installation Tools Required: Tape Measure, Masking Tape, Level, #2 Phillips Screwdriver, Drill with 1/8" and 3/16" bits, mallet or hammer, wood block, razor or sharp knife, hacksaw, pencil, clear silicone caulking.

Optional: Miter Box, File and Center-Punch.

1 The Waterfall Model 79C Door can be used with any Waterfall stall frame configuration. Refer to the frame instruction for proper handing of the door in the frame.

Caution: Doors must always open outward.

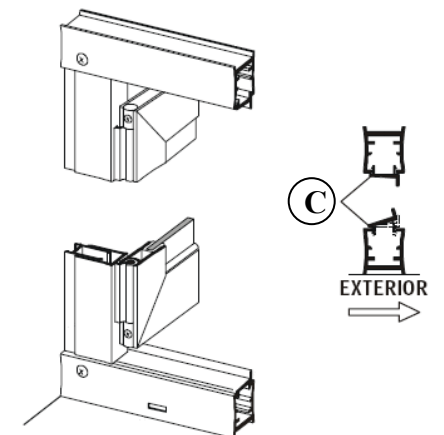

2 Press the hinge jamb [A] and strike jamb [B] over the appropriate posts (180°, 90°, or 135° posts) or wall jamb as determined by the door hand.

NOTE: The magnetic strip on the strike jamb must face the exterior of the unit.

3 Snap the fillers [C] into the frame curb and header between the door jambs. Be sure the raised lip on the filler is to the exterior of the unit.

Center the curb filler between the hinge and strike jambs. Hold in place with masking tape.

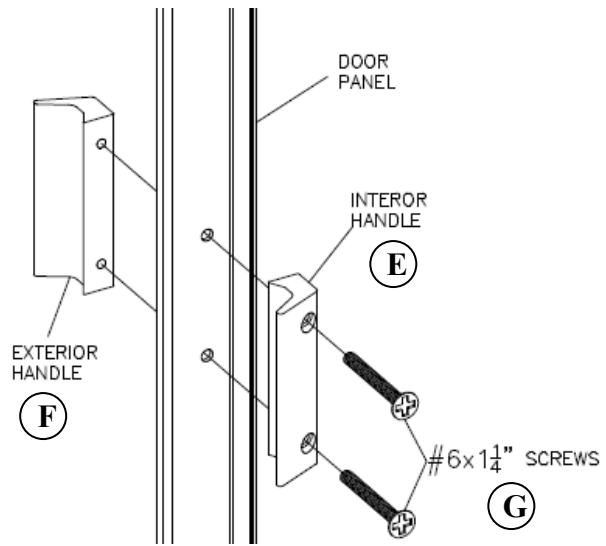

4 Pull the bottom of the hinge jamb [A] tight to the curb filler [C] and plumb the jamb. Drill two 1/8" holes through the hinge jamb and into the wall jamb as shown in the illustration. Drill a third hole centered between the two. Enlarge the outer holes for screw clearance with a 3/16" bit. Attach the jambs with three #8 x 1/4" truss head screws [D].

Slide the header filler tight against the hinge jamb. Push the strike jamb [B] tight against both fillers. With the hinge jamb plumb this will plumb the strike jamb. Attach the strike jamb in the same manner as the hinge jamb.

5 Attach the interior door handle [E] and the exterior door handle [F] to the door with two #6-32 x 1 1/4" round head screws [G].

For drip rail installation refer to separate instruction sheets Adjustable Drip Installation or Standard Drip Installation.

Refer to the frame instruction for completion of the unit installation.

Clean your new Waterfall Enclosures with a soft cloth and a non-abrasive cleaner with a neutral Ph. Do not use acid based cleaners, vinegar or scouring pads to clean your unit.
